1.Make sure python in installed before running the install bat file(only need to run this once)

Name	Date modified	Type	Size
OsuFiles	30/08/2021 11:04 am	File folder	
Chat	30/08/2021 10:43 am	Text Document	1 KB
chromedriver	26/08/2021 9:59 pm	Application	10,916 KB
Install	29/08/2021 1:14 pm	Windows Batch File	1 KB
Instrutions	29/08/2021 12:59 pm	Text Document	1 KB
OsuThing	30/08/2021 11:04 am	Python File	7 KB

2.Copy chat off of osu's website

```
osu.ppy.sh/beatmapsets/996024#osu/2083421

```

3.Remove everything in chat.txt and then paste from website
all text before and after an osu link will be removed
folders to stor each osu map are created and maps are sorted based on what comes before a group of maps
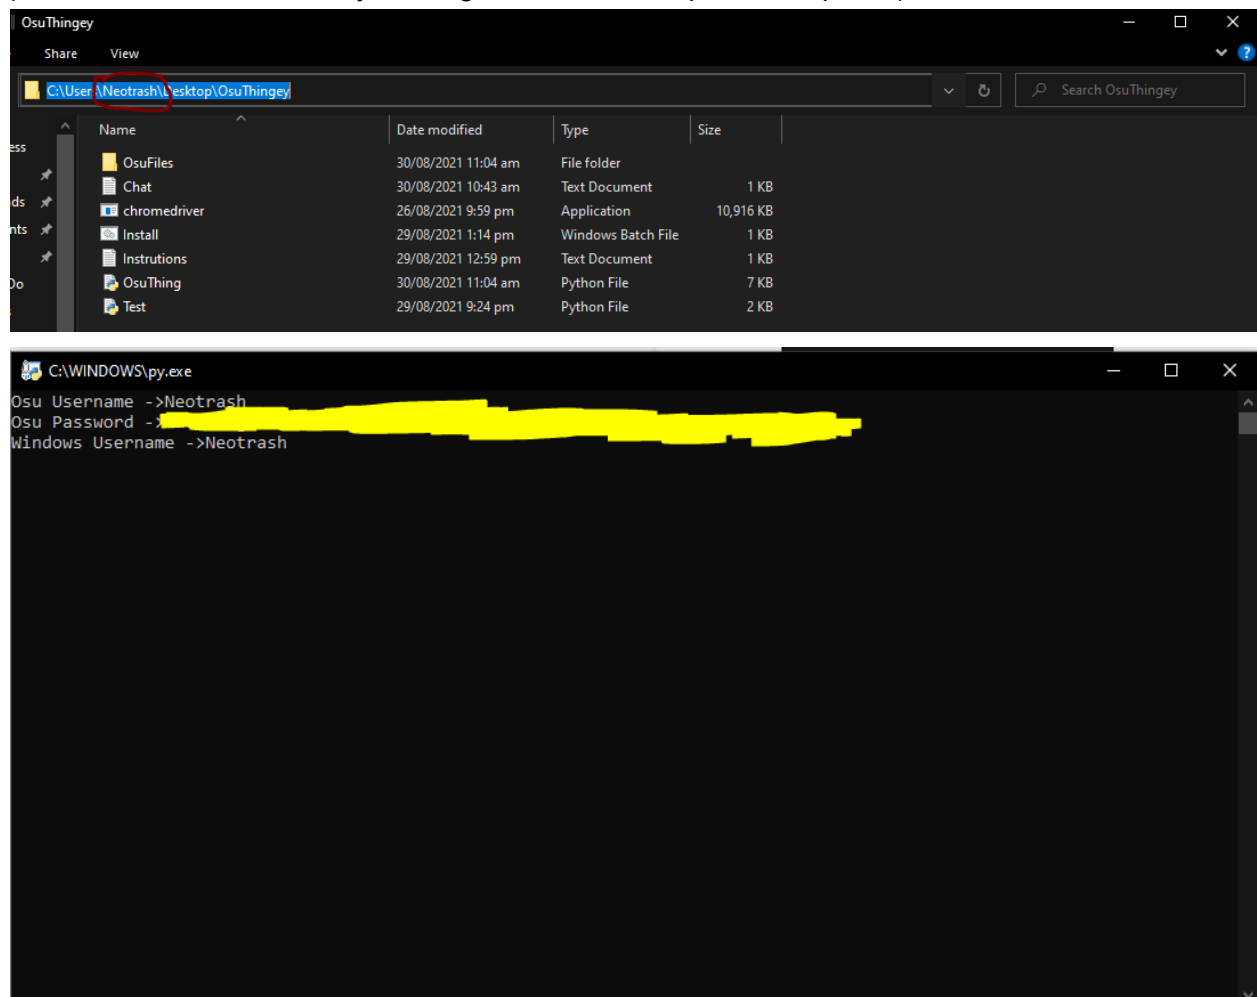

Chat - Notepad

File   Edit   Format   View   Help

4.9+
```

folder "4.7+"

4.Run the python file and put in osu username and password (case sensitive)
(Find windows username by clicking the bar at the top of file explorer)

READ EVERYTHING BELOW THIS STATEMENT
-Must be using chrome
-MAIN FOLDER MUST BE IN DESKTOP NOT IN A FOLDER ON THE DESKTOP OR
ANYWHERE ELSE.

- if there are webdriver errors then replace the 'chromedriver.exe' file with your version:
click ⋮ in the top right of chrome then help>about chrome

download from this link
https://chromedriver.chromium.org/downloads

- Make sure the username and password as well as the username for windows is correct otherwise it will loop forever

- If there is a captcha in osu the program will not be able to pass it but you can go to the window (chrome) the program is using and then do it yourself. The command line will print (Page not loaded) until the captcha is passed if this happens.

-Page not loaded can also be printed when the page hasn't loaded yet but it's pretty obvious when there's a captcha.
